

Global Forestry Capital Launches Luxembourg Regulated Forestry Fund

Luxembourg, April 11, 2011 - Global Forestry Capital today announced that they will launch their fully regulated Specialized Investment Fund in Luxembourg, the Global Forestry Growth Fund (the "Fund") LFP PRIME SICAV SIF S.A. The fund is to invest in sustainable timber plantations, direct plantation land ownership and private equity ventures within the forestry sector.

The Fund is targeting above average returns with minimal correlation to traditional asset classes such as bonds and stocks. With rising commodity prices and a growing global demand for timber the Global Forestry Growth Fund offers investors the unique opportunity to gain timber exposure in a fully regulated and transparent investment vehicle.

"We are delighted at the successful launch of the Global Forestry Growth Fund in Luxembourg," said Jeroen van Belkum, Director of Global Forestry Capital. "The fund is set to provide investors with an opportunity to benefit from long term capital growth from investing directly and indirectly in sustainable forestry assets. Our open-ended Fund seeks to deliver above market returns in an asset class that has minimal correlation to traditional financial markets."

"Forestry has historically been predominantly dominated by large financial institutions such as Pension funds and endowments; Global Forestry is proud to now offer these investment opportunities to a wider array of investors," said Jose Garcia, Director of Global Forestry. "This is an exceptional value proposition, developed from the ground-up to ensure the best quality in service providers and a management team with leading industry knowledge."

The Fund offers private and institutional share classes in GBP, EUR and USD. Global Forestry Capital boasts over 30 years of combined management experience in alternative fund management and Forestry investments.
